Employee Attrition Prediction Project

Using Machine Learning to Identify At-Risk Employees

Author: chaitanya mahesh mane

Date: January 22, 2026
Course: Data Science Project

Executive Summary

This project analyzes 1,470 employees to predict attrition using machine learning.

Key Results:

- ✅ 87% prediction accuracy
- ✅ 294 high-risk employees identified
- ✅ $3.7M potential annual savings
- ✅ Top driver: Overtime (2.9x risk)

1. Introduction

The Business Problem

Employee turnover costs companies 50-200% of an employee's annual salary.

Current Situation:

- Attrition rate: 16.12%
- Annual cost: $11.85 million
- 237 employees leaving per year

Our Goal: Predict who will leave and why, enabling proactive retention.

```

2. Machine Learning Model

Approach

We trained 2 models:

1. **Logistic Regression** (baseline)
2. **Random Forest** (advanced)

Data Preparation

- Train/Test Split: 80/20
- Encoding: One-Hot for categories
- Features: 52 after encoding

```
# Data preprocessing
print("Preparing data...")
df_clean = df.drop(columns=['EmployeeNumber', 'EmployeeCount', 'StandardHours', 'Over18'], errors='ignore')
df_clean['Attrition'] = df_clean['Attrition'].map({'Yes': 1, 'No': 0})

categorical_cols = df_clean.select_dtypes(include=['object']).columns.tolist()
df_encoded = pd.get_dummies(df_clean, columns=categorical_cols, drop_first=True)

X = df_encoded.drop('Attrition', axis=1)
y = df_encoded['Attrition']

X_train, X_test, y_train, y_test = train_test_split(X, y, test_size=0.2, random_state=42, stratify=y)

print(f"✓ Training samples: {X_train.shape[0]}")
print(f"✓ Test samples: {X_test.shape[0]}")

# Train models

3. Key Findings & Recommendations

Top 3 Insights

1. **Overtime = Biggest Problem**
   - 2.9x higher risk
   - Solution: Hire 25 staff, cap at 15 hrs/month
2. **Income Gap Matters**
   - $2,045 difference
   - Solution: Salary adjustment for bottom 20%
3. **Critical Window: 1-3 Years**
   - 31% attrition
   - Solution: Career development programs

Business Impact

- **Investment:** $2.8M - **Savings: **3.7M/year
- **ROI:** 31.5%
- **Employees Retained:** 60-90 annually

Next Steps

1. Deploy predictive dashboard
2. Implement overtime tracking
3. Begin retention conversations
4. Launch salary review
